

**NAME:** Cabanting, Andree

**DATE:** 26/09/2025

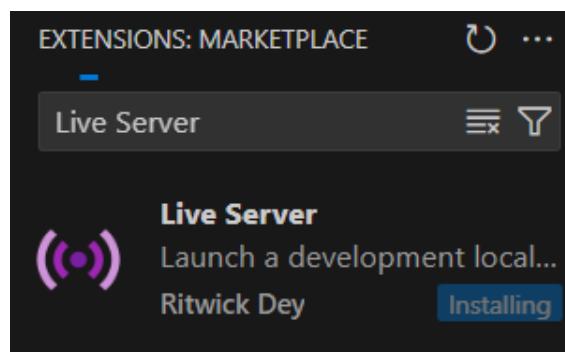

## Lesson 5: Links, Images, and Videos

### I. Initialization

- Create a folder on your desktop called **lastname-lesson5**.
- Open this folder in VS Code.
- Create and name your html file **lastname-lesson5-practice.html**
- **All practice activities below should be done in lesson5-practice.html.**
- Create another html file named **lastname-visionboard.html**. This is for the activity you will accomplish after the lessons and practice.
- Start your basic html structure. For your head title, name the page “[Name’s] Lesson 5”

- In Visual Studio Code, click the **Extensions** icon
- Search for and install **Live Server**, pictured below. *If prompted for an administrator password, please enter username z and password z.*

## II. Links in HTML

The `<a>` element, defined as the **anchor**, is used to create **hyperlinks**. It connects one resource to another: a page to another page, to an app, to a file, and more.

The World Wide Web is based on the concept of hyperlinks, and this is still in practice in today's modern-day internet. This is how we navigate between webpages, download files, and the like.

**Declaration:**

```
<a href = "www.linktosite.com">Link text here</a>
```

Where:

- `a` is the anchor tag
- `href = "www.link.com"` contains the link to something, usually a site.
- Any text placed inside an `a` tag will appear like this!

### Links and Files

Links can be used to allow users to download files. This is done using the **download** clause. A sample declaration is like so:

```
<a href="sampleresume.pdf" download>Click to view my resume!</a><br>
```

However, in order for the HTML page to read, view, and upload a file for download, it must first be placed within the VSC workspace. Otherwise, no download will occur.

**Click to view my resume!**

### Links and Headers

Headers can be turned into links. To do this, we “wrap” a header tag around an anchor/link tag, like so:

**Syntax:**

```
<hx><a></a></hx>
```

where *x* is any header - 1-6

```
<h2><a href="https://www.wikipedia.org" target="_blank">Go to Wikipedia</a></h2>
```

The entire header now becomes clickable. This is often used in news articles, blogs, or card-style layouts, where the title itself is the link to the full article.

**Go to Wikipedia**

**Links inside body text:**

Links can also be put anywhere within a <p> tag by using the <a> tag around any word. Here's an example:

```
<p>I love learning in the <a href="https://ubaguio.edu/">University of Baguio</a> because it's fun learning!</p>
```

I love learning in the [University of Baguio](https://ubaguio.edu/) because it's fun learning!

Above, we can see that any word/s enclosed with the <a> tag becomes a link.

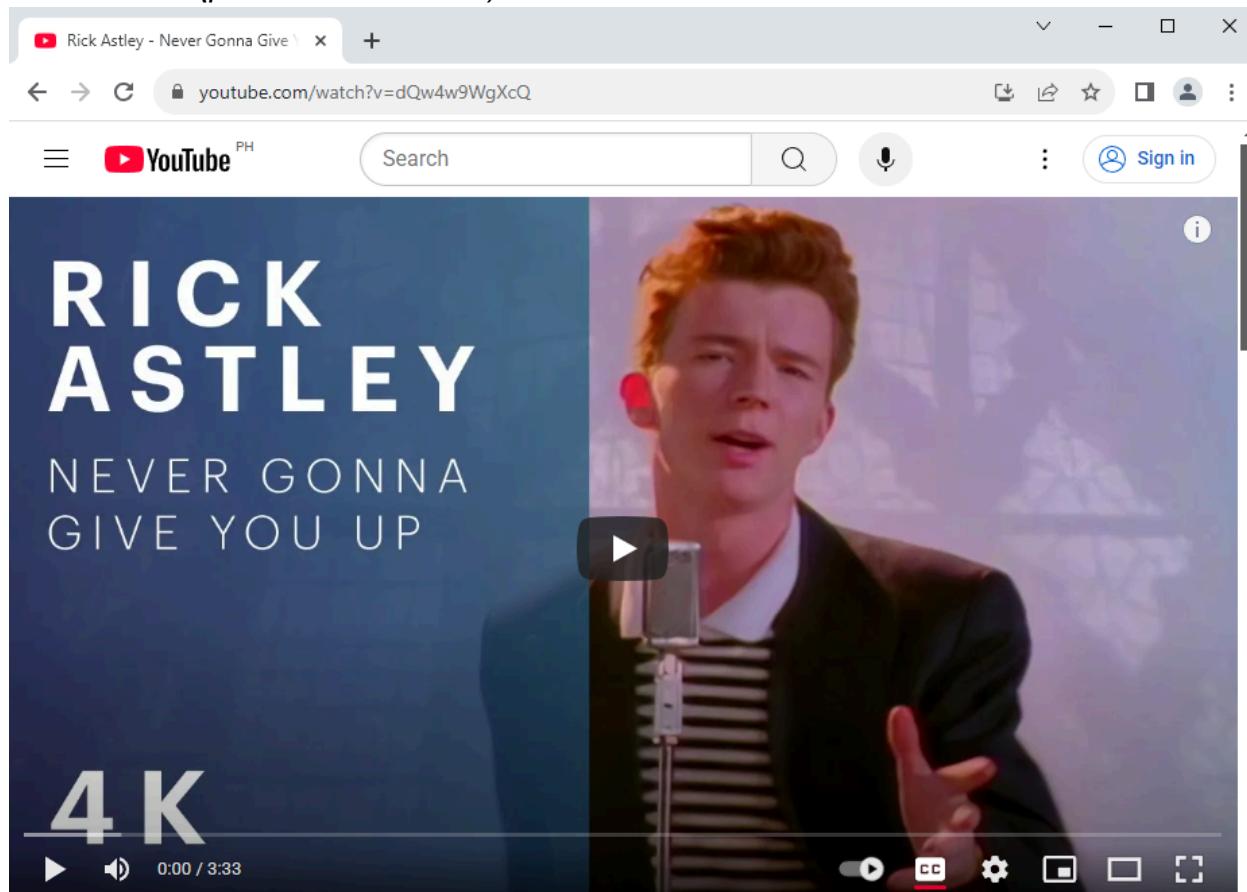

### Practice #1

1. Copy the code below, then produce the **screenshot** of the resulting **site**.

```
1  <!DOCTYPE html>
2  <a href="https://tinyurl.com/yfbdkhuv">Visit this site!</a>
3  </html>
```

**Screenshot:** (paste within the cell)

2. Download the **vouchercode.txt** file attached to this assignment in your Google Classroom. Move it inside your working folder.

Copy the code below, then provide the screenshot of the resulting **site** and answer the short question below:

```
<!DOCTYPE html>
<a href="vouchercode.txt" download>Download the Voucher code!</a><br>
</html>
```

**Screenshot of Result: (paste within the cell)**

<b>Question:</b> What happened when you clicked the link? What was the contents of the file?	<b>Answer:</b> When i clicked the linked it opened the file that i downloaded and pops up the text.
--	---

3. Write a paragraph defining a word you resonate with. Within that paragraph, choose a relevant word to turn into a link. Link the word to the Merriam-Webster page containing its definition. An example has been provided for you:

```
<p>unbowed ,ən-'baud  
Not bowed down,not subdued.  
Sample usage: bloodied but <a href="https://www.merriam-webster.com/dictionary/unbowed">unbowed</a></p>
```

Unbowed

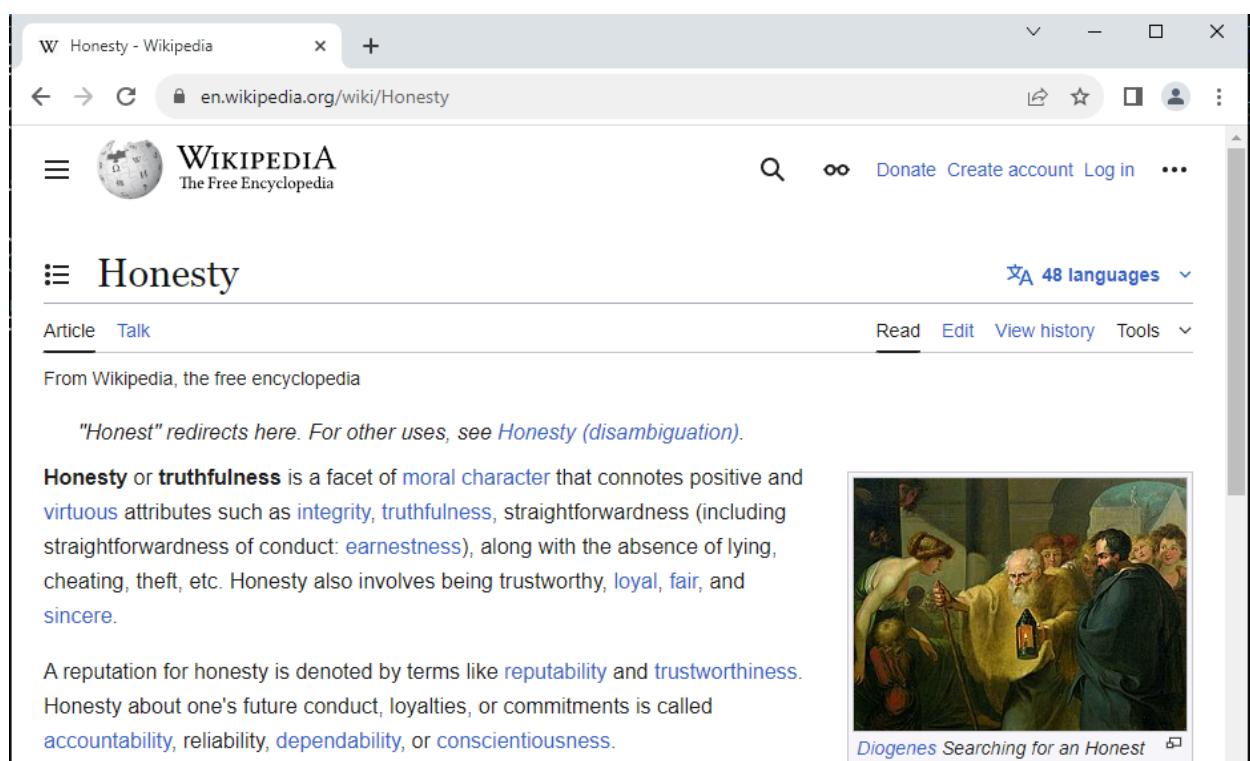

un**bowed** ,ən-'**baud** Not bowed down,not subdued. Sample usage: bloodied but [unbowed](https://www.merriam-webster.com/dictionary/unbowed)

**Screenshot of Code: (paste within the cell)**

```
<p> "Honest" redirects here. For other uses,  
see <a href="https://en.wikipedia.org/wiki/Honesty">Honesty</a>  
</p>  
</html>
```

**Screenshot of Resulting Page: (paste within the cell)**

"Honest" redirects here. For other uses, see Honesty (disambiguation).

**Honesty** or **truthfulness** is a facet of **moral character** that connotes positive and **virtuous** attributes such as **integrity**, **truthfulness**, **straightforwardness** (including straightforwardness of conduct: **earnestness**), along with the absence of lying, cheating, theft, etc. Honesty also involves being **trustworthy**, **loyal**, **fair**, and **sincere**.

A reputation for honesty is denoted by terms like **reputability** and **trustworthiness**. Honesty about one's future conduct, loyalties, or commitments is called **accountability**, **reliability**, **dependability**, or **conscientiousness**.

*Diogenes Searching for an Honest*

### III. Images

The `<img>` tag displays images on a webpage. Images make a webpage visually appealing and help communicate ideas quickly. Humans process images faster than text. We use images to illustrate content, show identity, and create engagement.

The base syntax of declaring an image is as follows:

```
  

```

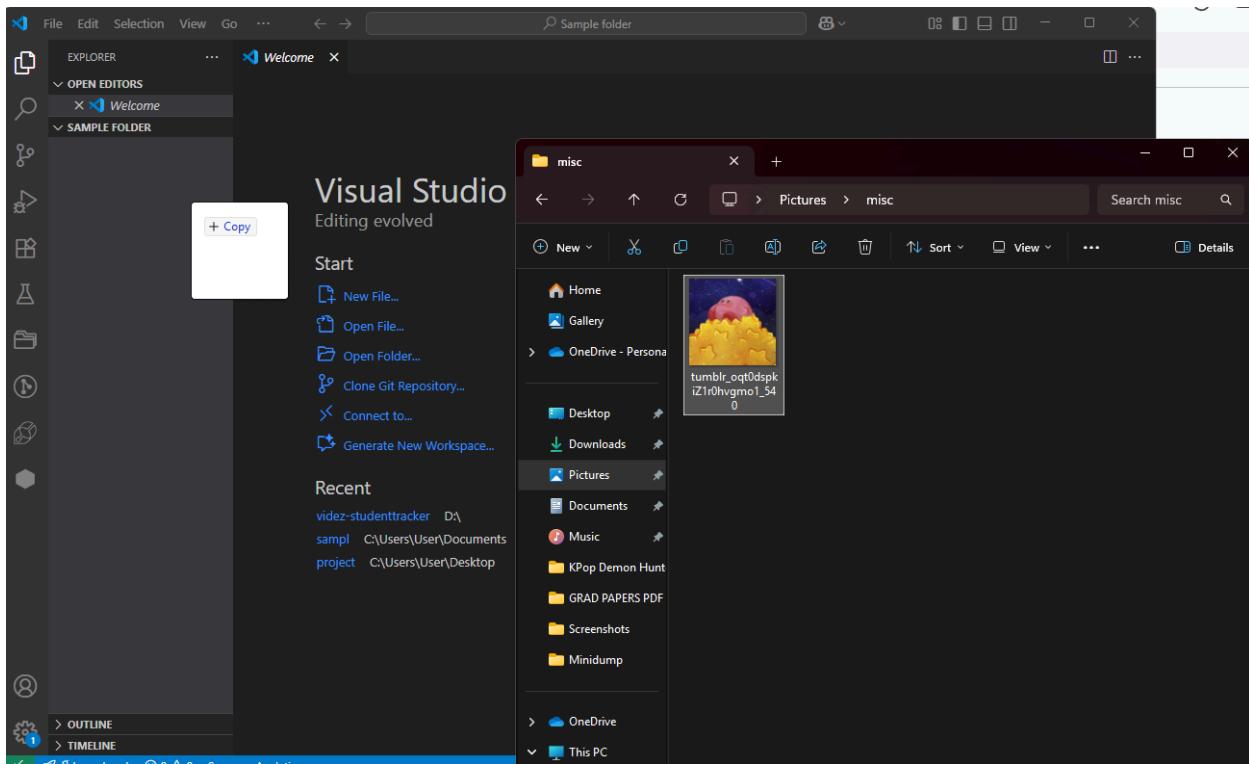

The `src` tag defines the path to an image. This can be a link to an online source, usually an image on the internet, or an image file within the working folder.

#### How to Use Images from Online Sources (*Google, or any site*)

When taking images from the web, we can use them in our HTML pages by right-clicking them and choosing the option to **copy image address**. This is what we can paste into the `src` section of the `<img>` tag.

#### How to Use Local/Downloaded Images

When using local images (i.e., those downloaded to/already existing in the computer's storage), we must first insert these into our VSC workspace/folder in order for the compiler to be able to access it. This can be done by simply **dragging and dropping** the image directly into the VSC workplace, like so.

```

```

In the above example, we specifically stated the size (in pixels) of the image using the **width** and **height** tags. There are multiple ways to do this, with another way being the one pictured below:

```

```

Either way is valid, as it can still successfully set the image's size. If an image's size is not specified in the tags, the HTML file will automatically use its default sizing.

```

```

Another element we have to include in our images is an **alt tag**. An alt tag, like the one pictured above, is a short line of text describing the image. This is mainly for accessibility purposes, as assistive tech like screen readers rely on alt tags to describe images to the visually impaired.

### Images as Links

Clickable logos use **<a>** tags wrapped around **<img>** tags. This is why, for example, when we click the Facebook logo, we are transported back to the homepage. This can be declared like so:

```
<a href="link.com"></a>
```

### Practice #2

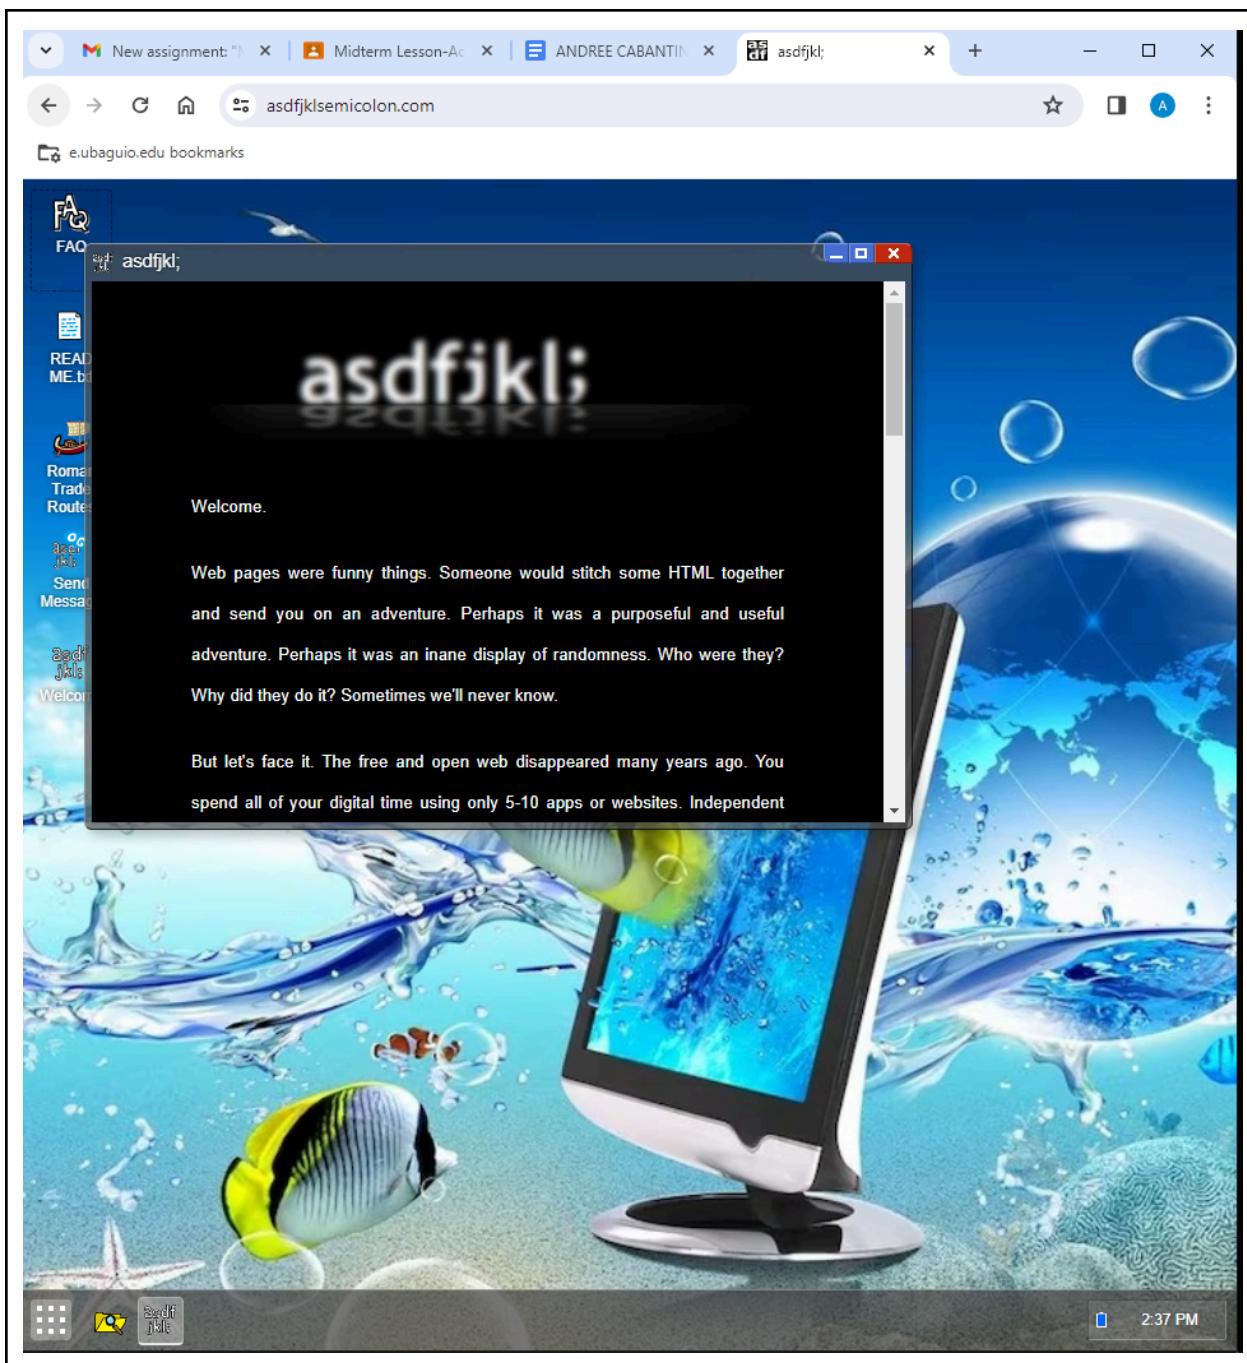

Download and import **target.png**, (attached to the assignment) and insert it into your workspace. Copy the code below, then provide a screenshot of the resulting page. Briefly answer the follow-up question.

```
<html>
<body>

<h2>Click me</h2>
<a href="https://www.asdfjklsemicolon.com"></a>

</body>
</html>
```

1. Screenshot of Resulting Page: (paste within the cell)

2. What was the site you were led to? Briefly describe it.

It was like an old windows desktop with a text opened.

3. Find the logo of your favorite band, studio, company, etc. Insert it into your HTML page, and size it to 500x500 pixels.

**Screenshot of code:**

```
<h2>Favorite Logo</h2>
<a href="https://www.redbull.com/ph-en"></a>

</html>
```

### Midterm Activity #1: Vision Board

**Instructions:** Create a Vision Board webpage using HTML. This is essentially a collection of images and text that represent your dreams, inspirations, and goals for the year 2025. You will combine images, links, and text into a single HTML file.

#### 1. Image Content: IMPORTANT:

- a. **One (1)** picture of yourself (or a character/actor that represents you). This must be a **link** that points to your social media page, e.g., Facebook, Instagram, X, and the like.

i. **8 images** representing your:

1. School goals
2. Friendship goals
3. Relationship goals
4. Hobby goals
5. Personal goals
6. Career goal
7. Travel goals
8. Family goals

**2. Text Content**

- a. Your HTML must have at least one header that contains a clickable link. This may lead to any **appropriate and relevant** site.  
 b. At least 1 full paragraph describing and explaining the vision board you created. In this paragraph, at least **one word** must be a link.

**3. Style & Layout**

- a. Add some style customizations: a change in font, background color, and the like.

**★Challenge for advanced students:**

*Arrange these pictures in a grid, or in any other more creative manner. ★*

**SUBMISSION INSTRUCTIONS:**

1. Submit this document as **LASTNAME-LESSONACT5.PDF**
2. Submit your **lastname-lesson5-practice.html**
3. Submit your **lastname-visionboard.html**.
4. If you used downloaded pictures, be sure to **upload all pictures along with your other files**. Otherwise, I will not be able to see your images on your site.

**Rubric for Grading:**

Criteria	Excellent	Good	Satisfactory	Needs Improvement	No Attempt
Images (25 pts)	<b>25 pts:</b> 9 images used correctly (self + 8 inspirations), with alt/title where required, links applied properly	<b>20 pts:</b> 8–9 images present but missing 1–2 required attributes/links	<b>18 pts:</b> At least 7 images, some attributes/links missing, but effort shown	<b>12 pts:</b> Only 5–6 images, many attributes/links missing	<b>0 pts:</b> Fewer than 5 images, or no submission
Links (15 pts)	<b>15 pts:</b> Self-image links to social media + 1 linked image + links in text/header all function correctly	<b>12 pts:</b> Most links work, but 1–2 missing or broken	<b>11 pts:</b> At least 2 working links, but missing one required type (social, text, or image)	<b>7 pts:</b> Only 1 link present, or most links broken	<b>0 pts:</b> No working links
Text Content (10 pts)	<b>10 pts:</b> Clear header with a link + 1 full paragraph (4+ sentences) with inline link	<b>8 pts:</b> Text present but missing 1 required link (header or paragraph)	<b>7 pts:</b> Header and paragraph present, but links not working or incomplete	<b>5 pts:</b> Only header or only paragraph included	<b>0 pts:</b> No header or paragraph present
Style & Creativity (10 pts)	<b>10 pts:</b> At least 2 style attributes applied, creative/engaging board	<b>8 pts:</b> Some style used, but minimal creativity	<b>7 pts:</b> Style attempted but poorly applied or inconsistent	<b>5 pts:</b> Very little styling, unorganized layout	<b>0 pts:</b> No attempt at styling
Effort & Presentation (5 pts)	<b>5 pts:</b> Board feels complete, personal, and well-presented	<b>4 pts:</b> Some effort shown, but looks rushed	<b>3.5 pts:</b> Meets minimum but lacks polish or personality	<b>2 pts:</b> Minimal effort, little connection to student's goals	<b>0 pts:</b> No submission
<b>TOTAL: 65</b>
